WOMEN SAFETY GUIDELINES

Women's safety involves strategies, practices, and policies which aim to reduce gender-based violence (or violence against women), including women's fear of crime, around Women's safety involves safe spaces.

Space is not neutral. Space which causes fear restricts movement and thus the community's use of the space. Lack of movement and comfort is a form of social exclusion.

Conversely, space can also create a sensation of safety and comfort and can serve to discourage violence. Therefore planning and policy on safety should always involve and consider women.

These guidelines contain many suggestions for planning and running a safe event. They also identify mandated requirements imposed by central government and local authorities.
